

Sat Paul Mittal School's new endeavour: Life Skills

-a beginning to realize our dream

In a constantly changing environment, having life skills is an essential part of being able to meet the challenges of everyday life. So, adhering to its vision of creating the entrepreneurs of tomorrow, Sat Paul Mittal School has initiated Life Skills for the Satyans in the session 2016-17 to empower them to have self-awareness by recognizing their strengths and working on their weaknesses with stress on the reasoning and logical thinking. Life skills period introduced in the curriculum is a great success with students looking forward to each period as a new learning experience. This unique venture flagged off with a very interesting activity: Sailing to a continent. Students were really thrilled with such a stupendous activity and felt that it is a stress buster for them. The excitement was unmatched. All the groups participated in the activity and concluded that team work is extremely important and it's better to mutually resolve any disagreements. They were able to justify their choice of prioritizing parents, clean environment, food, warm clothes etc over materialistic things like mobiles, junk food, bed room etc. Students were thrilled after the class. The activity was thoroughly enjoyed by them. Even the introverts participated enthusiastically.
