

Leading the Technological Revolution!

Digital inclusiveness and technology has become the need of the hour for the schools to create individuals adept with 21st Century skills. There is a need for a paradigm shift from traditional practices to practices which are knowledge driven and ICT empowered in this present era of globalization. Surging forward on this new school of thought, Sat Paul Mittal School has once again brought a revolution by conducting an online exam for Computers for class VI to VIII. The paper is designed using Google Forms and the marking is done using Flubaroo and Form List. The exam is having only MCQ's and it was of the standard equivalent to NTSE and Olympiads. It has eliminated the checking pressure from the teacher and has reduced the anxiety level of the students as they do not have to write the exam.

The Principal, Ms. Bhupinder Gogia, congratulated the faculty for bringing about a change by conducting an online examination. She said being initiator of GEG at Ludhiana, this initiative taken by school has proved once again that one should embrace technological innovation in letter and spirit. It is through the use of such innovative techniques that Sat Paul Mittal School is famed as one of the most progressive schools across the country. This revolutionary initiative has brought us close to the vision statement of the school and will be conducting online exams for other subjects also.
