

Launching TED-Ed Clubs in Punjab-Visualizing the Path to Premier for Sat Paul Mittal School!

The effect of laughter on someone who's sad. The danger and excitement of dirt biking. The reason human beings need so much sleep. The thought of infinity.

These are just a few of the topics that students are exploring through TED-Ed Clubs. This new program, announced today by Sat Paul Mittal School as an educational initiative -TED-Ed, a way to celebrate the ideas of students around the globe. The school has taken up the global program to nurture its students' passions by providing them a platform to practice presenting their ever-evolving ideas. Resource person Ms. Ridhima Bharara, parent of Satyan Dishita Bharara, was invited to apprise the

students with the Global program and inspire them to join the Global Student Council through TED -Ed Clubs.

The school through TED-Ed Clubs will help students to connect and interact with other members across the globe and become a part of the global community of likeminded people and creative problem solvers. Students with the help of an adult facilitator will identify and research the ideas that matter to them the most. TED-Ed Clubs offer students the opportunity to connect with others who, like them, are unabashedly curious about the world. Not only this TED-Ed clubs provide a forum for students to develop, present and record their own original ideas in the form of short TED Talks. The prime aim of the club is to enhance the personal growth of the child by acquiring 21st century skills. TED-Ed Clubs offer students a hands-on opportunity to work on the storytelling and communication skills that will be vital, no matter what career path they end up strolling down. The major take away of this program is authenticity of one's story. The focus is on discovering the uniqueness in every child and giving them a right platform to voice their opinion in a creative manner.

The resource person added that the TED-Ed Club's experience will surely allow students to effectively articulate their self-directed learning and independent thinking. This global program is designed in such a way to get students to permanently wear their thinking caps.
