

**25th October, 2017**

### **Getting a head start in finding a career @ Sat Paul Mittal School**

With an aim to offer a global and enriching platform to the students to get exposed to career choices available, Sat Paul Mittal School organised “THE SAT PAUL MITTAL SCHOOL CAREER FAIR 2017-18” in the school premises on 25th October, 2017. A few of the prominent universities that were invited to be a part of

the Career Fair were Ashoka University, India; ICAS Manipal, India ; The Council for American Education; Instituto Marangoni, Italy/UK and Avanse Educational Loans. The University officials and delegates visited the school campus and appraised all the prospective students and parents on course choices, career prospects, admission procedures and deadlines. The programme also covered several important points that students must be apprised with while deciding their career path. They were advised and guided on financial planning and were also informed about available scholarship (both in and outside India), constraints of funds and destination. The students were

introduced to a holistic view about the global society, internship, off-campus study opportunities and the value of internationalism within the curriculum in their undergraduate programmes. The programme ended with an interactive question-answer session wherein the delegates answered the queries of the students and gave them a clearer prospective for the future they have imagined for themselves. Indeed, the enlightening programme provided students with a full circle knowledge regarding ample career prospects to choose in national and international universities.
