

Technology- the birthplace of innovation, creativity and change

“Any sufficiently advanced technology is indistinguishable from magic.”

— Arthur C. Clarke

The passion for learning fuelled by the spirit to succeed kick started ‘The Cyber Fest 2018.’ To provide a canvas to the students to unveil their inner Picasso, a string of competitions including Digital Art, Staging Presentations, Brochure Making, Movie Making, Animated Story using Scratch and Website Designing were lined up for classes II-VIII. Our tech-savvy students aptly showcased their endowment by using **Windows 10, MS Power Point 2013, MS Word, Movie Maker, Microsoft Photos and HTML.**

Questions are the best way to gain deeper insights and develop more innovative solutions. So why not utilize them to ignite a curiosity in our students? A week long Cyber Quiz was held throughout wherein the students were invited to answer questions in a special “ Quiz

corner”.

In a creative attempt to disseminate information and hone the computer skills of the Satyans, ‘The Handy IT Tip of The Day’ was shared in the Morning assembly.

To realize the dream of an all-inclusive Sustainable Development, we have amalgamated with schools and organizations worldwide to achieve. The projects undertaken by the Satyans were showcased via **Skype to Skype Master Teachers in Vietnam and Hungary.** The participants were adjudged on the basis of their Creativity, Relevance to the Topic, Application of Knowledge, Percentage of Work Completed and Overall Presentation. The teachers and the students presented their voice on **Flipgrid.** An exclusive Webinar was conducted by the **IT Head Ms Monica Joshi** which was highly appreciated by the faculty members.

Indeed, the Cyber Week achieved its motto and enlightened the students that we now have programs and platforms that can transform learners into globally active citizens, opening up countless avenues for communication and impact. The Cyber extravaganza was truly enlightening and interesting.
