

Why it is important to be Creative?

We often think about creativity as making something, but in fact the root meaning of the word means “To Grow”. Everything feels so alive, interesting and fulfilling, and our perceptions expand. Everyone is creative in some unique way. A workshop was conducted by Ms.Charu Gupta mother of Shaurya Gupta of class V-C and Shreya Gupta of III -D. She emphasized that education should aim at creating men and women who are creative and discoverers. Rules and regulations generally hamper and kill creativity. It is the art of teacher to awaken joy in creative expression and knowledge which would help the students to embrace their creativity and give wings to their imagination without the fear of failure. Creativity is the most dynamic and free form of self-expression. So set your minds free, let the thoughts come, break the boundaries and express.
