

Students of IAYP and Rotary Club made Eco- Friendly Ganesh Idols

Sat Paul Mittal School is always striving to save environment and promote Sustainable Development Goals set by UNO. In line of such endeavours, students of IAYP and Rotary Club made an effort to reach to SDG #15 by making eco-friendly Ganesh idols. During Ganapati Visarjan, the Ganesh idols immersed in water bodies cause water pollution as they are mostly made up of POP and painted with lead infused colours. Hence, to make people of Ludhiana aware about such hazards, students made Ganesh idols with mud as well as added seeds of small plants like coriander. Such idols can be easily immersed in water at home in a small pot. As they have seeds embedded in them, the mud will act as a suitable substratum, thus a small kitchen garden can be established.
