

## Nandika Auluck of Sat Paul Mittal School wins laurels at the International Science and Engineering Fair (ISEF) in Texas

It was a proud moment for Sat Paul Mittal School as Satyan Nandika Auluck got selected amongst thousands of students from India to represent the nation as a part of TEAM INDIA at the International Science and Engineering Fair (ISEF), held at Dallas, Texas from the 13<sup>th</sup> May to 19<sup>th</sup> May 2023. She brought laurels to the school by winning second position under the category “Serving Society through Science” and an award money of \$500. Nandika submitted 2-page digest summarizing the theory, methods and new results via ISEF 2023 website. After the paper was accepted, she was invited to present her research work at the Conference. Earlier this year, she was also the recipient of Grand Award for her project in the category of Robotics and Intelligent machines at the IRIS National Fair 2023.

ISEF 2023 brings together the international community of researchers, engineers and designers engaged in methods and techniques for computation, modelling, simulation, measurements and application of electromagnetic fields. To quote Nandika, “This achievement is the highest honour and tremendous highlight of my academic life”. She felt fortunate that she was a student of the school like Sat Paul Mittal, where the teachers stimulate a student’s brain in the most meaningful way and where the Principal supports progressive ideas for her School.

Ms Bhupinder Gogia, Principal, Sat Paul Mittal School, congratulated Nandika Auluck for this remarkable achievement.
