

Workshop on Cyber Security held for Classes VI-XII

In today's world, technology serves as an indispensable catalyst in our lives, facilitating heightened ease and swiftness across all endeavors. Protecting lines of code, defending privacy and trust, the very fabric of our digital existence is of paramount importance in today's tech savvy world. Sat Paul Mittal School believes in equipping its students to the latest trends and provide protection from the various threats. A workshop on Cyber Security was held on 23rd April 2024 at the Mittal Auditorium, Sat Paul Mittal School for the students of Classes VI to XII. The resource person of the workshop was Mr. Arun Soni, an internationally acclaimed author and Cyber Security Expert and a Digital Evidence Specialist from Chandigarh. He has authored an astounding 182 books covering a wide range of subjects, including IT, AI and Cyber Security.

The enlightening session started with an overview of the cyber threats and risks thereby highlighting the importance of cyber security awareness. He shared the best practices for securing oneself and one's business on the internet such as password management, data encryption, 3-2-1 Backup rule as well as securing the browsing habits. He made use of certain case studies and informed the students about the common cyber-attacks. The participants engaged in lively discussion about their own experiences with cyber security incidents.

The workshop provided information about the cyber security and aimed to educate the students about the cyber threats and educate them regarding the best practices for staying secure online. Overall, the workshop was a resounding success, with participants leaving the hall with great knowledge.
